

Innovation for culinary perfection

PANORAMA

**VENTILATED HOT
DISPLAY CABINET**

Elegance and performance for your products

ROTISOL
Z.I LA TRENTAINE - 77507 CHELLES CEDEX - FRANCE
www.rotisol.com

An Elegant Design, an Innovative Technology

With its **totally transparent aesthetic**, this panoramic display cabinet showcases your products thanks to its **secure glass shelves**, **large side windows** and **LED lighting** on each level.

Designed for self-service, it encourages purchases while reducing your operating costs. An investment that boosts your sales from day one.

INNOVATIVE HEATING TECHNOLOGY

Thanks to **convection heating on each level**, this display case maintains your food at a **core temperature of +63°C to +70°C**, in compliance with veterinary standards (guaranteed food safety). Its design allows **products to be stacked on top of each other**, optimizing storage capacity, with convenient rear loading.

Combining performance and convenience.

VERSATILITY AND VARIANTS

The **panoramic ventilated display cabinet** can be adapted to all your needs thanks to its different variants :

Various sizes : Choose the ideal configuration for your space.

Convenient loading : The **rear service door** facilitates refilling and maintenance.

Customization : Design and accessory options to fit in perfectly with your environment.

Whether you're a caterer, supermarket or restaurant owner, this display case offers a tailor-made solution for presenting and storing your hot dishes elegantly and efficiently.

The right solution for any space :

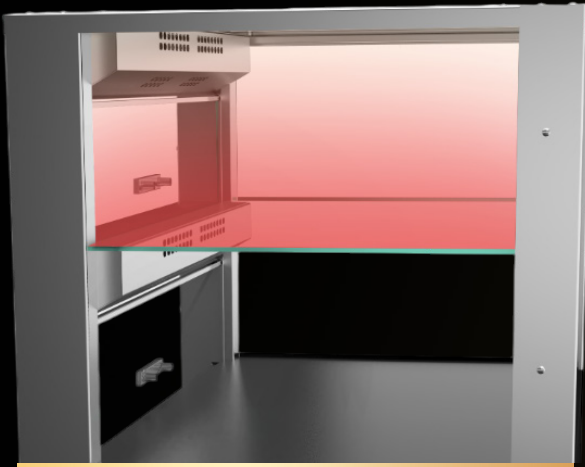

Whether you need a **compact** model for a small space, or a **high-capacity** display cabinet for a large flow, our range adapts to your needs. Find the ideal size to maximize your presentation and sales.

TECHNOLOGY FOR HEAT DISTRIBUTION

The **PANORAMA** display cabinet's patented technology guarantees **homogeneous heat distribution**.

Each level is independently heated, ensuring the **ideal temperature** for all your products, from bottom to top.

Level control allows the temperature to be changed or switched off according to the flow of the day.

Front or rear control

UNRIVALLED ENERGY SAVINGS

The **PANORAMA** hot-ventilated display cabinet combines **independent heating control by level** and **anti-radiation thermal K.Glass** for reduced consumption.

Thanks to its innovative technology, it reduces your electricity bill by **-25% (general control)** to **-80% (independent control per level)** compared with competitor models. A high-performance, eco-responsible solution for your business.

VISIBILITY & OPTIMAL PRESENTATION

LED lighting on every floor : Highlight your hot dishes with powerful, energy-efficient lighting.

Total transparency : Admire and control your products, displayed from bottom to top, for impeccable presentation at all times.

READY TO HIGHLIGHT YOUR PRODUCTS AND ATTRACT YOUR CUSTOMERS?

Discover **PANORAMA**, the display cabinet that combines performance and aesthetics.
